

PRATICA MODULA

Escape sign and safety luminaire with high type of protection and high impact resistance. Housing with angular contours and clear polycarbonate cover. Light guidance through white polycarbonate reflector. Installation through novel mounting adapter with integrated water level, which can also be used as junction box for all incoming and outgoing cables. The mounting adapter is only used for the connection to an integrated plug fixture as well as for accommodation of optional accessories. The actual luminaire can consequently be configured and (in battery operation) programmed comfortable on a work surface and only needs finally to be latched onto the mounting adapter with the integrated plug fixture.

Versions for surface wall and ceiling mounting and with additional accessories for recessed wall and ceiling mounting, bracket and chain/wire
